

Enterprise Academy - enterprise summer schools challenge events

no limits has a wealth of experience in running motivating and engaging enterprise challenge events and we will be delivering exciting summer schools for 50 students in each of the Enterprise Academy Schools during the Summer Holidays.

- **in-school:** a fabulous event which will be held in-school;
- **problem solving and creative thinking:** the teams will be given a precise brief covering all aspects of the challenge - which they need to follow throughout - thereby testing their ability to creatively respond to the challenge and solve problems;
- **rising to the challenge:** challenges will be created with District Councils to develop business and enterprise skills and designed to be interesting, fun and engaging, and to ensure that all members of the group have a chance to shine;
- **plan – do – review:** challenges require students to develop their project management, planning and organisation skills and constantly check where they are and what they need to do next.
- **presentation:** the challenge will culminate in all groups making a short presentation to “pitch” their proposal / product or service, with all members of the group participating – thereby developing their communication skills;
- **award ceremony:** the event will close with an award ceremony, with all participants being awarded a certificate which provides evidence of the skills they have been developing.

Who for? **Years 7 - 13** (*schools to decide which students are involved*)

Duration? Whole day events involving 50 students.

Bespoke for the enterprise academy? The summer school events for the enterprise academy are being designed with the District Councils to reflect local priorities with environmental and regeneration themes. Judges from the local business community and local councillors will bring an important real life aspect to the events.
